“As we expand our relationship with Infor, we look for continual, incremental improvement to our processes. Infor M3 will allow us to improve efficiency by automating processes and increasing the alignment between maintenance operations and the business. This will lead to greater productivity and better customer service.”

Kathryn McLean, IS Manager, Scott Bader

## About the company

Scott Bader is a global chemical company with manufacturing sites in Europe, the Middle East, South Africa, Canada, and India. The company manufactures, sells, and distributes a wide range of synthetic resins and polymers to a variety of markets and has built a reputation for innovation, quality, and excellent customer service. The company's key product groups include UP resins, vinyl esters, glass, and ancillaries. Established in 1921, today Scott Bader is a €227 million company and employs over 650 people worldwide. ## Business case

- Eliminate manual administration and paperwork for preventive and breakdown maintenance.
- Gather insights about maintenance trends, such as types of breakdown and equipment failures, to help reduce unplanned downtime.
- Increase visibility into spare parts inventory and align reordering with the needs of the production department.

## Why Infor? Infor delivers:

- Increased productivity while ensuring compliance with regulations and best practices, with the help of automated maintenance processes.
- Enhanced decision making through improved visibility into maintenance trends with better data for analysis.
- Improved efficacy of preventive maintenance to optimize spare inventory and reduce downtime.
