Embracing enhanced features

Actelion Pharmaceuticals (Actelion) is a leading biopharmaceutical company that discovers, develops, and commercializes innovative drugs for diseases with significant unmet medical needs. During the many years that Actelion has been using Infor's solutions, the company has worked with Infor's product development team to gain additional functionality. To get more out of these advanced features and improve the user experience, Actelion decided to upgrade to version 13.2 of Infor M3.

Infor has expertise in the pharmaceutical industry and product development is at the heart of their strategy. We believe Infor M3 is the right product for our company.”

Volker Dierks, Senior Systems Controller, Finance, Actelion Pharmaceuticals

Deploying the latest Infor solutions

Creating consistent processes at all sites

Actelion deployed the version 13.2 of Infor M3 across all of its sites to ensure that its business processes were consistent. Actelion worked closely with Infor's development team to identify the enhanced features that are now helping to improve the distribution and financial closing processes. At the same time, Infor M3's robust adaptability makes it easy for Actelion's users to work with the system around the globe.

Taking a strategic approach to upgrading

Before deciding to upgrade, Actelion thoroughly reviewed all of the features that Infor M3 would provide. During this analysis phase, Actelion evaluated and adjusted its existing systems to make the upgrade process faster and more efficient. Actelion also used this time to put the right teams in place at each of its sites to expedite the upgrade process. Finally, with prompt support from Infor Consulting Services (ICS), Actelion was able to complete the project in a timely and cost-effective manner.

“

I really appreciated working with Infor. They delivered what was expected without any pressure. I think it was a great opportunity to build a partnership as well. I am looking forward to the next project.”

Rene Schwarz, PMP
Senior IT Project Manager
Global IT Services, Actelion Pharmaceuticals
