“ Infor’s leadership has been greatly appreciated throughout the upgrade and implementation process.”

Jim Stewart, Project Manager, Clarke Environmental Mosquito Management, Inc.

## About the company

Since establishing the first mosquito control service in 1946, Clarke has grown into a international public health company that delivers sustainable mosquito control products and aquatic services to government, commercial, and residential customers. They touch over 330 million people worldwide by helping make communities more livable, safe and comfortable. To learn more, visit [www.clarke.com](http://www.clarke.com).

## Upgrading Infor M3

- Provided an improved multi-site, multi-country, multi-company, and multi-currency ERP environment.
- Secured new technology to better support future growth and IT enhancements.
- Reduced software modifications and customizations.
- Streamlined operations to better meet customer needs.

## Why Infor?

### Infor M3 delivers:

- Purpose-built software that simplifies business processes for regional, national, and international chemical manufacturers and distributors.
- Built-in flexibility that enables configuration and personalization to meet the unique business requirements of chemical companies.
- Functionality to manage complex, configured, and attribute-controlled products, and directly support costing, planning, and execution.
- The opportunity to eliminate customizations and move to additional Infor applications in the future.
